 Major Process: Facultative Lagoons – 3 cells
 Aeration Lagoon – 1 cell
 Facility Classification: Wastewater Treatment Class 1
 Collection Classification: Collection Class 2

SECTION 3: Executive Summary

Annual average concentrations were **exceeded** for total phosphorus. pH exceeded the objective limit on a single occasion.

The total effluent discharge from the Sewage Treatment Plant for the year was 431,525.20m³.

The total raw sewage flow into the lagoons for the year was calculated to be 431,943.45m³ including the hauled septage being deposited in the lagoons.

Daily average raw sewage flows were **not exceeded** during the 2023 reporting period.

SECTION 4: Process Data

Peak flows were measured as high 4,602.8 m³/d, this was approximately 307% of the rated capacity. The 2023 sewage flows showed an increase from 2022. Historically, the average sewage flows have exceeded the rated capacity. It has been identified through annual inspections of manholes that there is some infiltration occurring in the joints of the manholes when ground water levels rise. It is expected the Municipality will revisit the issue of manholes in 2024.

There is a trigger to assess the capacity of the lagoons once the flows reach 80% capacity. Currently, the facility is at 78.8%.

The total raw sewage flow into the lagoons for the year was calculated to be 431,525.20m³.

The annual average for total phosphorus exceeded the limit and objective specified in the ECA. A single pH values was above the objective of 8.5; in August, pH was measured at 9.19. All other parameters were within compliance. See section 5 for more details.

The objective limits specified in the ECA were met more than 50% of the time during the 2023 operating year. The operator did not observe a visible film, sheen, foam or discoloration on the receiving waters nor did he notice floating or settleable solids.

A total volume of 431,525.20m³ was discharged in 2023.

In an effort to meet the effluent objectives, the lagoon is treated with Ferric Sulphate on a continuous basis. As well, batch treatments can be performed if needed. No batch treatments were performed in 2023.

Based on the above monitoring program and sampling records, the sewage works provided adequate treatment.

SECTION 5: Facility Upsets & Non Compliances

Phosphorous levels were above the prescribed limit on multiple occasions throughout the year and ended with an overall average above compliance limits.

Phosphorous levels began to rise in June and stayed fairly high throughout the entire summer and into fall, with the highest single result being 3.78mg/L in October. Operators reported that the setup for ferric dosing was inadequate. Equipment programming only allowed for one ferric pump to run at a time. This limited the Operators abilities to increase the dosage any further. Programming changes were made in October to allow for two pumps to run at a time. Since these programming changes were made, there has been a decrease in phosphorus levels in the final effluent. It will likely take several months to see the full effects of this change. Operations also noted that summer dumping of hauled sewage creates a spike in phosphorus.

Some samples were taken to determine where the highest levels of phosphorous were being found.

Sample dates/results:

Total Phosphorous results in mg/L

Date	Cell 1	Cell 2	Cell 3
Aug 1, 2023	3.50	5.40	1.71

PH exceeded the objective in August with a single result of 9.19. PH fluctuates with the growth of algae. This was the cause of the high pH in this instance.

Sampling was not conducted on October 3, 2023 for effluent sampling and was instead taken on Oct 5, 2023. This was a mistake by the attending operator.

During the 2023 year there were no overflow/bypass events.

Copies of the incident reports can be found in [Appendix A](#).

SECTION 6: Maintenance

Plant maintenance is monitored using a Work Management System (WMS). Effluent monitoring equipment was calibrated as required in 2023. The flow meter was verified on May 9, 2023, and passed; the verification record is maintained on site and electronically on the OCWA Hub server.

Maintenance and verification reports are attached as [Appendix B](#).

SECTION 7: Sludge

Sludge measuring was conducted in 2023 by Hydrasurvey. The next sludge measuring will be conducted in 2028.

Cell #1 22,329 m³

Cell #2 9,778 m³

Cell #3 22,317 m³

Cell #4 0.0 m³ *not measured*

SECTION 8: Complaints

There was 1 community complaint received during the 2023 year.

In July of 2023, a complaint was made regarding a smell from the Robinson Street Station. The operator investigated and found no leaks or issues. No further complaints received.

SECTION 9: Other

Some routine high pressure sewer cleaning was completed in a few problem areas, including one of the list stations.

There was no additional work completed in the sanitary sewer system in 2023.

There was no work that required the use of an LOF.

There were a single deviations from the sampling dates for 2023; this deviation is listed in **SECTION 5: Facility Upsets & Non Compliances**.

A copy of the 2024 monitoring schedule is attached as **Appendix C**.

Septage was deposited at the lagoon by Wally's Septic. Volumes for each can be found in **Appendix D**.

For 15 years Manitoulin Special Olympics (MSO) has shared the love of sport and sportsmanship to over 60 athletes on Manitoulin Island. Special Olympics provides sports training and competition for children and adults with intellectual disabilities. It has created confidence in our individuals, enabling many to smile and laugh without being judged. It has provided a feeling of inclusion and accomplishment.

There are 7 sports programs on Manitoulin Island, all of which require funds to provide equipment, training, transportation, and registration to compete.

Bluegrass in the Country is run by volunteers and 100% of the funds raised stay with Manitoulin Special Olympics. MSO has managed to obtain quality coaches who have provided opportunities for our athletes to qualify at Regionals, Provincials, and Nationals and have even medaled at the World Games.

Bluegrass in the Country is held at the fairgrounds in beautiful Providence Bay on Manitoulin Island. It will be held from Friday, June 7th to Sunday, June 9th, 2024.

Dear Mayor/Reeve/CAO/Treasurer,

April 1, 2024, has been proclaimed as the official date on which the *Community Safety and Policing Act, 2019 (CSPA)* will come into force. At that time, it will repeal and replace the current *Police Services Act, 1990 (PSA)*.

We wish to confirm that the OPP 2024 Annual Billing Statements remain in effect after April 1, 2024, and municipalities will continue to be billed in accordance with costs in the statements.

Under the CSPA, all municipalities policed by the OPP will be subject to Regulation 413/23 *Amount Payable by Municipalities for Policing from Ontario Provincial Police*. This regulation preserves the cost-recovery methodologies currently in effect. The OPP Billing Model cost allocation method remains the same under Reg. 413/23. There are transitional provisions included in the Regulation that stipulate that 2024 annual billing statements will not need to be reissued.

Should you have any further questions about your annual billing statements or any other billing inquiries, please reach out to the OPP Municipal Policing Bureau Financial Services Unit at OPP.MPB.Financial.Services.Unit@opp.ca

Sincerely,
